- Note:**
1. The first tender was on a multiple price basis, while all subsequent tenders have been on a uniform price basis. As a result, for most tenders there is no tail and the prices and yields are based on the strike price. For index-linked gilts with a 3-month indexation lag the clean price shown is the real clean price i.e. it is the price excluding any inflation uplift. The tail figure for the October 2008 tender has been calculated from unrounded yields.
 2. For conventional gilts the yield shown is a nominal yield, while for index-linked gilts it is a real yield. For index-linked gilts with an 8-month indexation lag the yield is computed using a 3% inflation assumption, while for index-linked gilts with a 3-month indexation lag the yield does not depend on an inflation assumption.
